

MA · KIN

Apart from our export business through our customer's private brands, we have also developed our house brand called "MAKIN", meaning "Let's Have It!" in English, which covers almost every food and beverage category including canned seafood, canned fruits, canned vegetables, juices, pastry and condiments, etc.

Our MAKIN brand gives consumers tasty, hygienic, and healthy products made from fresh ingredients grown in Thailand. We always provide to our customers the products with high quality and the precision of nutrition facts on the label as a form of our customer cares. Our pre-designed label in English underlines the usage of our products in modern and sophisticated life, gaining patently customer's recognition due to its distinguishing and creative design. To give support to all consumers of different spoken languages, customized label is possible. We can support our clients with the addition of requested language (French, Chinese, Spanish, Arabic, etc) on the label and the modification of label artwork by our own designer upon request.
